## **“Climate Solutions are NOT Radioactive!”**

**Anti-Nuclear Organizations Join March to End Fossil Fuels**

***Nuclear-Free, Carbon-Free Marchers Demand 100% Renewable Energy, Call on Biden, UN Leaders to Ditch False Solutions***

**WHAT:** Anti-nuclear contingent at March to End Fossil Fuels

**WHO:** Dozens of grassroots, community-based, and national organizations

**WHEN:** Sunday, Sept. 17 @ 1pm Eastern (US)

**WHERE:** Broadway and 57th Street, New York City

**WHY:** The Nuclear-Free, Carbon-Free Hub will march with bright, bold signs and banners calling for real solutions to the climate crisis, including a just and equitable global transition to 100% renewable energy. President Biden and leaders of many industrialized nations are pushing false solutions and toxic, dead-end technologies instead of taking actions that are necessary, affordable, and feasible to maintain a livable climate. Biden has announced multiple deals to export failed, unproven, exorbitantly expensive nuclear power plants. To date, the US has not made comparable efforts to assist other nations in developing clean, safe, affordable, rapidly-deployable renewable energy sources, and has refused to contribute its fair share to global climate finance. The White House also endorses Japan's decision to dump radioactive waste from three melted-down nuclear reactors into the Pacific Ocean, over the objections of Pacific Island nations most at risk of sea-level rise and other impacts of global warming that threaten their existence.

**MARCH TO END  
FOSSIL FUELS**

**THE NUCLEAR-FREE,  
CARBON-FREE HUB**
